

Staunch Mobile Scissor Lift uses steel structure design. The maximum capacity can reach up to 1000kg, and can rise up to 18m height. It can be applied in equipment installation, maintenance and cleaning work, wild electrical facilities, high altitude pipeline framing, crane maintenance and etc. Mobile Scissor Lift platform is designed with multiple choice, including battery power source. It can be used in the wild with or without power supply.

Technical Data

Model No.	XE-M110S
Working height max.(m)	11
platform height(m)	9
Lift capacity(kg)	450
Platform size(mm)	1800*1000
Raised Time(s)	80
Power(kw)	
weight(kg)	1260
Tires	400-8 preumatic tires
